

DISAB Vacloader

(This unit is equipped with options)

CENTURION LN20

A truck mounted unit that can transport bulk materials and liquids by vacuum or overpressure through a hose system with a diam up to 200 mm. The vacuum unit is designed and adapted for mounting onto a four-axle truck chassis with two front axles.

The unit is equipped with a separate diesel engine offering the possibility to utilize local fuel taxation regulations. It also makes the machine operate independently of the truck.

The material tank and filter compartment are combined and the dust from the filter compartment is emptied through a hatch in the partition wall in the tank at the same time as the tank is tilted.

Collected material is discharged by tilting the tank or pneumatically through a hose.

Technical data

Diesel motor

A six cylinder turbocharged diesel engine complying with the EU Stage IV / EPA Tier 4f emission requirements.

Make	Volvo D8 TAD873VE
Cylinder volume	7.7 l
Power	235 kW/320 hp
Max engine speed	2200 rpm/min
Injection	SCR technology and a cooled EGR
Charging system	24 VDC
Engine cooler	Water to air
Air charging cooler	Air to air

Vacuum pump

Max.vacuum	Kaeser Omega 83 PV
Max overpressure	-950 mbar
Air volume, unloaded	+1100 mbar
Air volume (-500mbar)	8100 m ³ /h
Operating speed	7100 m ³ /h
Max power required	1100 - 2650 rpm
	220 kW

Main filter system

	2x35 galvanized cages with filter socks in needled polyester -glazed surface.
	Filter area 26 m ²
Safety filter system	3 filter cartridges - 33 m ² located in the machine house

Tank

Tailgate	Gross volume 12000 litres
Tipping system	Hydraulically operated and locked
Level guards	Hydraulic front cylinder, double acting system
	Wet resp dry level guards
