

Extended Service

Take control of your operating cost

DISAB's service agreement is the best way to take control of your operating costs. Apart from the planned maintenance we also offer repair due to wear and tear.

We at DISAB have a vision to satisfy our customers highly set demands on reliability and service life. We carry out service and provide spare parts for our own products under the brands TELLA, DISAB and VIBRAMAT. We can also offer the same for other brands.

Together, we work out an agreement that will suit you and your operation. Whether it's a small inspection service or the whole range together with education and extended service, it's your choice. A service agreement gives you a higher reliability and an increased safety through preventive measures. The condition of your vacuum equipment is continuously documented and therefore you can minimize the risk of unnecessary stoppage. Worn components can be changed or overhauled before they cause problems.

A basic service agreement is carried out with an interval set by you to suit your business. It could be once annually or several times per year. It can contain everything from an inspection of the equipment before a planned standstill, to a total service of the complete vacuum system.

Depending on the agreement, from a complete filter change to a small inspection, you will always have a grip of the condition of your vacuum unit.

WELCOME!

Extended Service
